**Background:** In March 2014, federal rules came into effect in how home and community based services were to be provided. The rules focused on providing services to individuals that were integrated in the community. HCBS rules entail mandated compliance and represent a significant, system-wide change to the way services are delivered. ***Given the broad scope of the rules, providers are encouraged to submit grant proposals for concepts that offer a unique and innovative path to their compliance with the final rules.***
