

Screen-shot overview, secure e-mail from RCRC:

Note for first time receiver of a Voltage secure mail, a one-time “account” authentication will occur. You will use your e-mail address as username, and give yourself a password you can remember. You are setting up this authentication on an RCRC encryption server. After you do this quick setup, just follow the easy steps below.

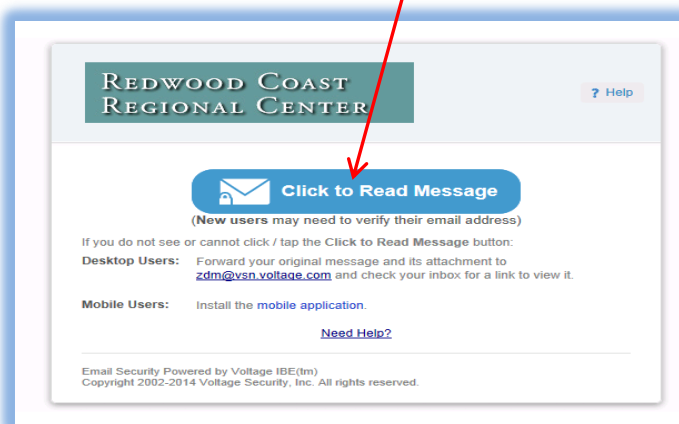

Scroll down view of same e-mail, open the “message_zdm.html”:

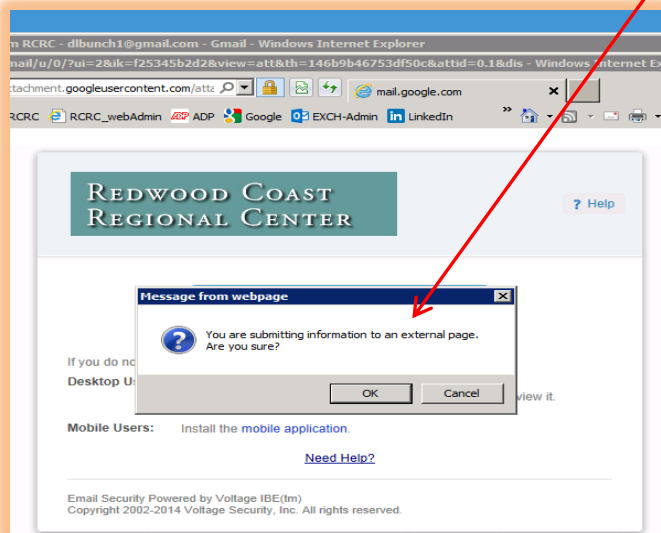

View after double-click of Download message,

next select “Click to Read Message”:

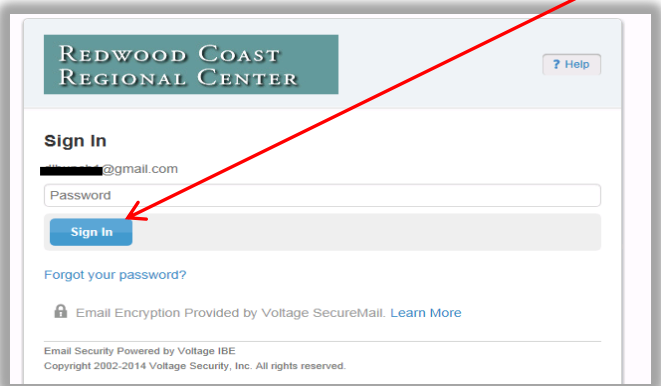

View after selecting "Click to Read Message", now select "OK" :

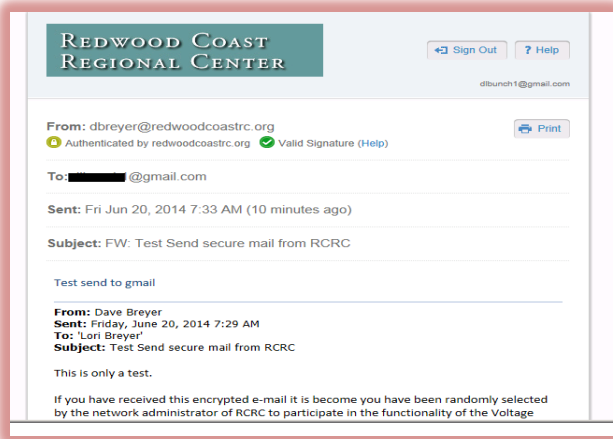

View after selecting "OK" to "Are you sure?"

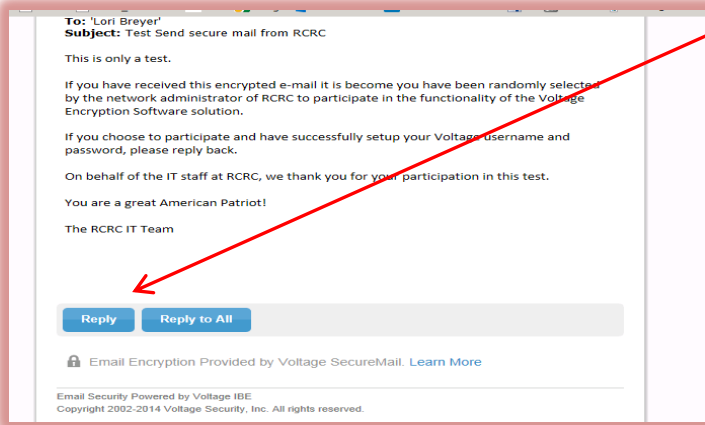

Input your e-mail and password you setup, then select "Sign In" :

Enter your password you set up and click "Sign In" , the e-mail is now viewable:

Scroll down view of encrypted e-mail showing the functionality of the receiver to “Reply” :

Also, this is the screenshot view of selecting the “Sign out” option in the email:
