

# NCI-IDD In-Person Survey

Redwood Coast Regional Center (RCRC) Report Fiscal Year 2020-21

***Message from the California Department of Developmental Services***

*Mission: The Department of Developmental Services (DDS) is committed to providing leadership that results in quality services to the people of California and assures the opportunity for individuals with developmental disabilities to exercise their right to make choices.*

The NCI-IDD In-Person Survey<sup>1</sup> (IPS) report was compiled by the Human Services Research Institute (HSRI) in accordance with Welfare and Institutions Code (WIC), Section 4571. It is an important effort to collect accurate, reliable, and valid consumer and family satisfaction measures, as well as consumer outcome data. More information about the California NCI-IDD can be found at <https://www.dds.ca.gov/rc/nci/>.

This is the fifth administration of the Adult In-Person Survey, with data collected from July 2020 through August 2021. During that time, 8,663 surveys were completed with adults with intellectual/developmental disabilities receiving at least one service beyond case management from a regional center. Due to COVID-19-related social distancing precautions, the Adult In-Person Survey was conducted virtually via video conferencing software this year. However, the data findings in this report contribute to our understanding of how California's system is performing. California can use these reports to monitor changes in the system and to guide strategic planning and quality improvement activities. Regional centers can use the data in a similar fashion at the local level.

This report does not compare California's data to the data of other states but does include the NCI-IDD Average across participating NCI-IDD states. This is because California's DDS service system is unique among states. Some of the things that make California's service system unique include:

California has longstanding statute that ensures services and supports are provided for eligible persons with intellectual/developmental disabilities.

- California's laws mandate intake, evaluation, and assessment within 120 days.
- California has a broad eligibility definition for receiving services.
- California has mandated services, including case management, with statutory limitations on caseload size.
- California's service obligations to the families needing services are, by law, from pre-conception to death.

---

<sup>1</sup> Formerly the Adult Consumer Survey

- California's regional centers are, by design, autonomous in that each center has a local board of directors to best address the unique needs of each of the 21 regions.
- Consumers or their families can call a team meeting at any time to request a change in service.

Reports like this offer DDS the opportunity to compare the results of the data across the years. System improvements will take time to identify and achieve, but this report provides valuable data and is one more tool in our continuous effort to improve services and supports to individuals with intellectual/developmental disabilities across California.

***Acknowledgements***

This report would not be possible if not for the 8,663 individuals who agreed to offer their time and discuss their lives in order to assist in improving the services of all people with intellectual/developmental disabilities in California. Additionally, a special mention goes to the families, friends, and staff members who participated in the survey process.

Table 129. Have you heard of COVID-19 (also known as coronavirus)? .....	120
Table 130. During COVID time, did any of these changes occur? .....	121
Table 131. During COVID time, did any of these changes occur? (continued).....	121
Table 132. During COVID time, if there were changes in your daily schedule (like if you stopped getting some services or had to stay home more), did you get to choose your new daily schedule?.....	122
Table 133. Think of how your life and daily routine changed since the beginning of COVID time. Have there been any changes that you liked? .....	122
Table 134. Is there a computer, tablet (iPad or similar), or smartphone that you can use in your home? .....	122
Table 135. How does your internet work at home?.....	123
Table 136. Have you ever talked to your service coordinator using videoconference or telehealth like Skype, Zoom or FaceTime? .....	123
Table 137. Think about talking to your service coordinator with videoconference or telehealth. Did you like it? .....	123
Table 138. Have you ever talked to any health professionals using videoconference/telehealth like Skype, Zoom or FaceTime? A “health professional” could be a doctor, nurse, therapist, or specialist who provides health-related services.....	124
Table 139. Think about talking to health professionals with videoconference or telehealth. Did you like it? .....	124
Table 140. Since the start of COVID time, did you do any of the following services using videoconference technology like Skype, Zoom or FaceTime?.....	124
Table 141. If you did any services over videoconference or telehealth, did you like doing services over video conference or telehealth? .....	125
Table 142. Since COVID time started, have you talked to your service coordinator enough? .....	125
Table 143. Since COVID time started, have there been times when you didn’t have the help you needed? .....	125
Table 144. Do you need more help or reminders to wash your hands regularly during the day?.....	126
Table 145. Do you need more help or reminders to wear a mask when you go outside or to places where other people are? .....	126
Table 146. Is there always a clean mask for you to use when you want or need one? .....	126
Table 147. Do you need more help or reminders to stay far enough away from people when you’re out in the community, so germs don’t spread?.....	127
Table 148. Since COVID time started, have your staff used personal protective equipment (PPE)? .....	127
Table 149. Since COVID time started, have you been more worried, scared, anxious, or sad than before? .....	127
Table 150. Do you want help to feel less worried, scared, anxious or sad?.....	128
Table 151. Since COVID time started, have you talked to your friends and family as much as you want? .....	128

## Quality Assessment Project and National Core Indicators®- Intellectual and Developmental Disabilities

This report contains regional center level results from California’s statewide National Core Indicators®-Intellectual and Developmental Disabilities (NCI®-IDD) In-Person Survey<sup>2</sup> (IPS) data collection from fiscal year 2020-21 (FY 20/21) in accordance with Welfare and Institutions Code (WIC), Section 4571. WIC, Section 4571 directs the Department of Developmental Services (DDS) to collect accurate, reliable, and valid consumer and family satisfaction measures as well as individual outcome data. In California, data from this project will be used to review and benchmark statewide and regional center developmental disability service system performance.<sup>3</sup> This report shows this regional center compared to the California statewide and NCI-IDD averages. Regional centers can use this report to help guide strategic planning and monitor systemic changes.

### What is NCI-IDD?

The NCI-IDD program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

NCI-IDD has developed more than 100 standard performance measures (or ‘indicators’) that states use to assess the outcomes of services for individuals and families, including outcomes in the areas of employment, rights, service planning, community inclusion, choice, health, and safety. In 2020-21 a total of 46 states, the District of Columbia and 22 sub-state entities participated in NCI-IDD.

### What is the NCI-IDD In-Person Survey?

The NCI-IDD In-Person Survey (IPS) is a face-to-face meeting conducted with a person who is receiving services from the state; it is used to gather data on approximately 60 consumer outcomes, and it is regularly refined and tested to ensure that it is valid and reliable. Due to COVID-19-related social distancing precautions, the NCI-IDD In-Person Survey was conducted virtually via video conferencing software this year. Surveyors meet with individuals to ask questions about where they live and work, the kinds of choices they make, the activities they participate in within their communities, their relationships with friends and family, and their health and well-being.

---

<sup>2</sup> Formerly the Adult Consumer Survey

<sup>3</sup> Refer to the California Statewide In-Person Survey Report FY 20/21 for information about Quality Assessment Project implementation, NCI and California’s statewide results.

Not all NCI-IDD states participate in the IPS every year. Twenty-six (26) states administered the In-Person Survey in 2020-21 and submitted valid samples for reporting.<sup>4</sup> Together, they collected survey responses and information from a total of 19,991 individuals.

Information contained in this report come from three distinct survey sections:

1. **Background Information.** This section consists of questions about demographics, residence, health, employment status, and services and supports. Data is generally collected from state records, service coordinator, or a combination of both.
2. **Section I.** This section attempts to determine the individual's level of satisfaction and opinions. It may only be completed through a direct meeting with the individual.
3. **Section II.** This section contains questions that are answered by a direct meeting with the individual when possible. If the person is unable to respond, a proxy who knows the person well may be used. Service coordinators are not allowed to respond to these questions on the individual's behalf.

## Presentation of Data

The charts in this document, grouped by subdomain, display the regional center results alongside the weighted CA and NCI-IDD averages. The charts are followed by accessible tables containing the same information.

Many questions in the IPS allow respondents to answer a question with “middle” response like “maybe”, “sometimes” or “in-between”. Data in this report are “collapsed” data. That means that two or more response options are grouped together if they are considered to reflect a positive outcome. To see the breakout of responses for each option, please see the 2021-22 California In-Person Survey Statewide report.

The CA and NCI-IDD averages are “weighted” to reflect the regional centers’ and states’ relative population and sample sizes. We created the weights using the regional centers’ and state’s number of valid surveys and its total survey-eligible population. This way, a regional center or state that provides services to a larger number of people but uses a sample similar in size to other regional centers or states has a greater influence on the overall state or NCI-IDD average (that is, its contribution is proportional to its service population).

---

<sup>4</sup> States that participated in the 2020-21 In-Person Survey were: Alabama (AL), Arkansas (AR), California (CA), Colorado (CO), Florida (FL), Georgia (GA), Hawaii (HI), Illinois (IL), Indiana (IN), Kansas (KS), Kentucky (KY), Michigan (MI), Minnesota (MN), Missouri (MO), Nebraska (NE), Nevada (NV), New Hampshire (NH), New Jersey (NJ), North Carolina (NC), Ohio (OH), Oregon (OR), Pennsylvania (PA), South Dakota (SD), Tennessee (TN), Virginia (VA), and Wisconsin (WI).

Regional Centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average. Some items collected from the Background Information section were not available in CA records and could not be collected during the survey interview, those outcomes are designated as 'n/a' at the statewide and regional center levels.

To find out more about the development of In-Person Survey, data analysis and state samples, check out the National In-Person Report: <https://idd.nationalcoreindicators.org/survey-reports-insights/report-library/>

### **Important note on Impact of COVID-19**

To help better understand the overall impact of COVID-19 on people receiving services, NCI-IDD added a state-optional COVID-19 Supplement to all NCI-IDD Surveys. The COVID-19 Supplement is intended to support the understanding of the experience of people with disabilities and their families at the beginning of the COVID-19 pandemic, and their interactions with services during that time. Regional center data from the COVID-19 Supplement is included at the end of this report and in the California Statewide report.

## Demographic Characteristics of Respondents

*This section presents descriptive information on the respondents surveyed.*

### **Important Note on Missing Data:**

For several states and regional centers, survey items in the Background Information section (including certain items related to Demographics, Health, Medication, and Wellness) had a large amount of missing data or data recorded as “don’t know.”

Detailed information by state can be found in the NCI-IDD National In-person Survey Report:

<https://www.nationalcoreindicators.org/resources/reports/>

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses. Please note that the NCI-IDD average reflects the average of data that were reported to NCI-IDD and may not be reflective of the service population across the country.

Table 1. Age

Regional Center	Mean	N
<b>RCRC</b>	42.0	457
<b>CA Average</b>	40.7	8,663
<b>Weighted NCI-IDD Average</b>	41.4	19,912

Table 2. Age Group

Regional Center	18-22	23-34	35-54	55-74	75 And older	Unknown	N

<b>Weighted NCI-IDD Average</b>	53%	10%	27%	8%	2%	19,826

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*\*CA Average had at least 25% "don't knows" and missing data

\*NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional Centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average.

## Choice and Decision-Making

*People make choices about their lives and are actively engaged in planning their services and supports.*

**Note:** CA statewide and NCI-IDD averages for all but one item (Chose Service Coordinator) in this chapter is risk adjusted. Risk (or “outcome”) adjustment is a statistical process that helps “level the playing field” by controlling for differences in the individual characteristics of people who completed the IPS. This analysis helps account for the fact that states have different eligibility definitions for services and may have samples with different characteristics.

The indicators are risk-adjusted using the following characteristics: age, level of intellectual disability, level of mobility, and whether any behavioral supports are needed to prevent self-injury, disruptive, or destructive behavior.

**All CA and NCI-IDD Averages are weighted unless otherwise noted.**

*Charts for Choice and Decision-Making*

Chose or had some input in choosing where they live (if not living in the family home)

Chose or had some input in choosing their housemates (if not living in the family home), or chose to live alone

Chose staff or were aware they could request to change staff

Decides or has help deciding their daily schedule

Can change their service coordinator if wants to

All CA and NCI-IDD Averages are weighted unless otherwise noted  
Regional Centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

## Health

*People secure needed health services.*

For several states and regional centers, survey items in the Background Information section (including certain items related to Health) had a large amount of missing data or data recorded as “don’t know.” State and regional center review of the data in this section noted that the data missing may not be missing randomly, and results **should be viewed with caution**. NCI-IDD averages that include states’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with an asterisk (\*). CA averages that include regional centers’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with a double asterisk (\*\*).

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are the data missing across the board for those in a specific waiver population in a given Regional Center? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses.

**All CA and NCI-IDD Averages are weighted unless otherwise noted.**

## COVID-19 Supplement

*In response to the COVID-19 pandemic, NCI-IDD added a state-optional COVID-19 Supplement to all NCI Surveys. The COVID-19 Supplement is intended to support the understanding of the experience of people with disabilities and their families at the beginning of the COVID-19 pandemic, and their interactions with services during that time.*

**All CA and NCI-IDD Averages are weighted unless otherwise noted.**

All CA and NCI-IDD Averages are weighted unless otherwise noted

\* CA Average had at least 25% "don't knows" and missing data

\* NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

*Charts for COVID-19 Supplement*

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*\*CA Average had at least 25% "don't knows" and missing data

\*NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

Has this person ever been diagnosed or presumed diagnosed with COVID-19?

Has this person ever required in-patient hospitalization due to COVID-19?

Have you heard of COVID-19 (also known as coronavirus)?

During COVID time, did any of these changes occur?

All CA and NCI-IDD Averages are weighted unless otherwise noted  
 \* CA Average had at least 25% "don't knows" and missing data  
 \* NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data  
 Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

During COVID time, did any of these changes occur? (Continued)

During COVID time, if there were changes in your daily schedule, did you get to choose your new daily schedule?

Think of how your life and daily routine changed since the beginning of COVID time. Have there been any changes that you liked?

Is there a computer, tablet (iPad or similar), or smartphone that you can use in your home?

All CA and NCI-IDD Averages are weighted unless otherwise noted  
 \*\*CA Average had at least 25% "don't knows" and missing data

\*NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

All CA and NCI-IDD Averages are weighted unless otherwise noted  
 \* CA Average had at least 25% "don't knows" and missing data  
 † NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data  
 Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

Think about talking to health professionals with videoconference or telehealth. Did you like it?

Since the start of COVID time, did you do any of the following services using videoconference technology like Skype, Zoom or FaceTime?

If you did any services over videoconference or telehealth, did you like doing services over video conference or telehealth?

Since COVID time started, have you talked to your service coordinator enough?

All CA and NCI-IDD Averages are weighted unless otherwise noted

\* CA Average had at least 25% "don't knows" and missing data

\* NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

Since COVID time started, have there been times when you didn't have the help you needed?

Do you need more help or reminders to wash your hands regularly during the day?

Do you need more help or reminders to wear a mask when you go outside or to places where other people are?

Is there always a clean mask for you to use when you want or need one?

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*\*CA Average had at least 25% "don't knows" and missing data

\* NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

Do you need more help or reminders to stay far enough away from people when you're out in the community, so germs don't spread?

Since COVID time started, have your staff used personal protective equipment (PPE)

Since COVID time started, have you been more worried, scared, anxious, or sad than before?

Do you want help to feel less worried, scared, anxious or sad?

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*\*CA Average had at least 25% "don't knows" and missing data

\*NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*\*CA Average had at least 25% "don't knows" and missing data

\*NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

**Table 127. Has this person ever been diagnosed or presumed diagnosed with COVID-19?**

<b>Weighted NCI-IDD Average</b>	98%	1%	1%	17,599

All CA and NCI-IDD Averages are weighted unless otherwise noted

\* CA Average had at least 25% "don't knows" and missing data

\* NCI-IDD Average includes data from states that had at least 25% "don't knows" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

**Table 147. Do you need more help or reminders to stay far enough away from people when you're out in the community, so germs don't spread?**

Proxy respondents were allowed for this question

Regional Center	Yes, needs more help or reminders to do this	No, does not need more help or reminders to do this	N
<b>RCRC</b>	35%	65%	450
<b>CA Average</b>	51%	49%	8,550
<b>Weighted NCI-IDD Average</b>	48%	52%	17,521

**Table 148. Since COVID time started, have your staff used personal protective equipment (PPE)?**

Proxy respondents were allowed for this question

Regional Center	Yes, all staff always	Some staff or sometimes	They used to, but don't anymore	No, no staff, never	N
<b>RCRC</b>	82%	9%	4%	5%	314
<b>CA Average</b>	87%	4%	3%	6%	6,010
<b>Weighted NCI-IDD Average</b>	85%	6%	5%	4%	13,695

**Table 149. Since COVID time started, have you been more worried, scared, anxious, or sad than before?**

Proxy respondents were allowed for this question

Regional Center	Yes, has felt more worried, scared, anxious or sad than before	No, has not felt more worried, scared, anxious or sad than before	N
<b>RCRC</b>	42%	58%	452
<b>CA Average</b>	39%	61%	8,416
<b>Weighted NCI-IDD Average</b>	37%	63%	17,165

All CA and NCI-IDD Averages are weighted unless otherwise noted

\*CA Average had at least 25% "don't know" and missing data

† NCI-IDD Average includes data from states that had at least 25% "don't know" and missing data

Regional centers receive an 'n/a' designation within the table if 20 or fewer people responded to the survey item; however, their data are included in the CA Average

**Table 150. Do you want help to feel less worried, scared, anxious or sad?**

Proxy respondents were allowed for this question

Regional Center	Yes, wants help and do not currently get any help	Yes, currently gets some help but wants more help	No, does not want help, or does not want more help than already getting	N
<b>RCRC</b>	15%	9%	76%	252
<b>CA Average</b>	11%	12%	77%	4,860
<b>Weighted NCI-IDD Average</b>	10%	13%	77%	9,527

**Table 151. Since COVID time started, have you talked to your friends and family as much as you want?**

Proxy respondents were allowed for this question

Regional Center	Yes	Some friends and family as much as I want, some not enough	No	N
<b>RCRC</b>	69%	22%	9%	432
<b>CA Average</b>	65%	18%	17%	7,944
<b>Weighted NCI-IDD Average</b>	66%	19%	16%	16,574

All CA and NCI-IDD Averages are weighted unless otherwise noted
